Betty Jeanl worked with you and Guy for years at PRL. Guy kind took my undisciplined and rambunctious self under his wing for many years. He was so instrumental in guiding my thinking, expanding my thoughts and keeping integrity in an argument. I love him for that. My developing alcoholism sadly made it difficult for me to be true to my friends and we drifted apart. But I benefited from his vigorous thinking and think of Guy often. I, too, went to Caltech and worked with George Hammond. I met Guy at DuPont and always felt a connection with him. He was a gentle soul.

Betty sorry to hear about Guy passing. Posted some pictures I have of him. The First one was taken near Richmond, Virginia near the cemetery where we had just laid our grandmother to rest in the Fall of 1971. The other photos were taken at a cook out in Aunt Florence's back yard.

BJ, Guy and I worked together for many years. During those years, I learned (from Guy) a lot about food, drink, chemistry, politics and most of all "How to Think". I'm so sorry to see him go but I will always pass on Guy's method of "How to Think".
